

Smith/Doe Wedding (Apr 19-20)

Prepared Monday, April 9th, 2013

*Weather planning and preparation
for your special day.*

Friday, April 19th:

Mostly sunny skies throughout the day and evening. Morning begins with temperatures in the low 50s, rising to around 61 by Noon and a high for the day of 65 by mid-afternoon. Cloud coverage in the afternoon hours will generally be around 30%-35%. No precipitation expected (0%).

Changes from previous forecast: Temperatures with this updates have trended slightly warmer, while there were no changes to the precipitation or cloud coverage forecasts.

Saturday, April 20th:

Clear skies in the morning will lead to increasing clouds as the rest of the day progresses. Morning temperatures in the middle 50s will increase to around 59 by Noon and the high for the day will be 63 by mid-afternoon. Cloud coverage by 10AM will increase to 40% and around 75%-80% by 2PM and the rest of the afternoon. Although there will be cloudier skies by afternoon and evening, we do not see any significant chance for precipitation (only 10%). Light winds of 5-10MPH will increase slightly to 10-15MPH for the afternoon and early evening hours.

CEREMONY (3PM-4PM): Mostly cloudy skies with temperatures between 61-63. No precipitation.

RECEPTION (5PM-Midnight): Mostly cloudy skies. Temperatures will slowly fall into the upper 50s by 8PM and will be around 52-53 by Midnight. No precipitation.

Changes from previous forecast: High temperatures for the day were a bit lower with today's update, due to an increase in cloudiness.

Sunday, April 21st:

Mostly cloudy skies in the morning with temperatures in the low 50s. Clearing skies are expected as the day progresses with partly cloudy skies by midday and the afternoon/evening hours (around 25%-30% coverage). Temperatures will warm into the upper 60s to around 70 by the afternoon hours with dewpoint temperatures also increasing throughout the day (more summer-like air mass pushes into the region). Southwesterly winds will also pick up by midday and afternoon with 15-25MPH sustained winds expected, gusting to around 35-40MPH. No threat of precipitation (0%).

Changes from previous forecast: We increased winds on this update, as well as pushed up high temperatures a few degrees warmer. Cloud coverage was also decreased for afternoon and evening hours.
